Answer the questions below. Underline your evidence.

Earth Day

Earth Day is a holiday that many people celebrate each year on April 22. It is a day to celebrate our planet and remember how to take care of it.

There are many things you can do to help take care of the earth. One important way is to recycle. Paper, plastic, and cans are some things that can be recycled instead of put in the trash. Another way to take care of the earth is to conserve water. You can save water by turning the faucet off when you are brushing your teeth. Saving energy is also important. Turn off lights and fans when you are not using them. Too many cars can pollute the air, so riding your bike or walking can help keep the air clean.

Celebrating Earth Day helps us remember how special the earth is and how we can take care of it.

--	--	--

When is Earth Day?

What are 2 things that can be recycled?

How does riding your bike instead of riding in a car help the earth?

Tell one thing you will do this week to take care of the earth.

Make an inference. What does conserve mean?

use not waste clean

Circle words or phrases in the passage that gave you a clue.
